INTRODUCTION

PhilanX is a Decentralised Autonomous Organisation (DAO) that focuses on charities, Philanthropic Projects and its community. PhilanX allows people to wrap their \$PHILANX into \$WPHILANX to be used in the PhilanX Governance System. \$WPHILANX can then be donated to charities or philanthropic projects, used to place votes on decisions and used by Authors to create Philanthropic Projects. PhilanX will first launch on the Binance Smart Chain (BSC) later followed by Avalanche (AVAX), Ethereum (ETH) and Fantom (FTM).

PhilanX has been developed to help create an impact on this Earth through philanthropic projects and donations to charity. Donations to Charities and/or Philanthropic Projects will receive on-the-go funding through 6% BUSD reflections if they choose to unwrap their \$WPHILANX and hold \$PHILANX.

PhilanX is a project that aims to provide a tool for humanity to help humanity without other forms of entities.

PHILANX

PHILANX METHODOLOGY

PhilanX is a DAO with Stable coin reflections launched on Binance Smart Chain, Avalanche, Ethereum and Fantom. Each network will provide staking of native \$PHILANX and LP tokens to receive \$PHILANX.

\$PHILANX tokens can also be wrapped into \$WPHILANX to participate in the PhilanX Governance System. Additionally, PhilanX will have several Non-Fungible Token (NFT) Drops each with their own set of utilities that benefit PhilanX and its community. One NFT utility will provide authentication access to Authors to access the Philanthropic Projects Portal

Stable Coin Reflections

PhilanX aims to provide Stable Coin on reflections on each of the four networks. Cryptocurrency is a fast moving and unpredictable market. Providing stable coin reflections aims to provide everyone with a safe passive income through the unpredictable market.

Holders of \$PHILANX on BSC will be able to start building a passive income with 6% BUSD Reflections on every buy and sell.

PHILANX

STAKING

PhilanX provides an opportunity to receive \$PHILANX through staking the Native token or LP tokens on each of the four networks.

Binance Smart Chain

\$PHILANX
BBNB/PHILANX LP-Tokens

Avalanche

\$PHILANX
AVAx/PHILAN LP-Tokens

Ethereum

\$PHILANX
ETH/PHILAN LP-Tokens

Fantom

\$PHILANX
FTM/PHILAN LP-Tokens

PHILANX

CONTRIBUTING TO THE LP TO RECEIVE LP-TOKENS

Contributing to the LP will provide the contributor a share of the pool (See Figure 1) and LP tokens (See Figure 2)

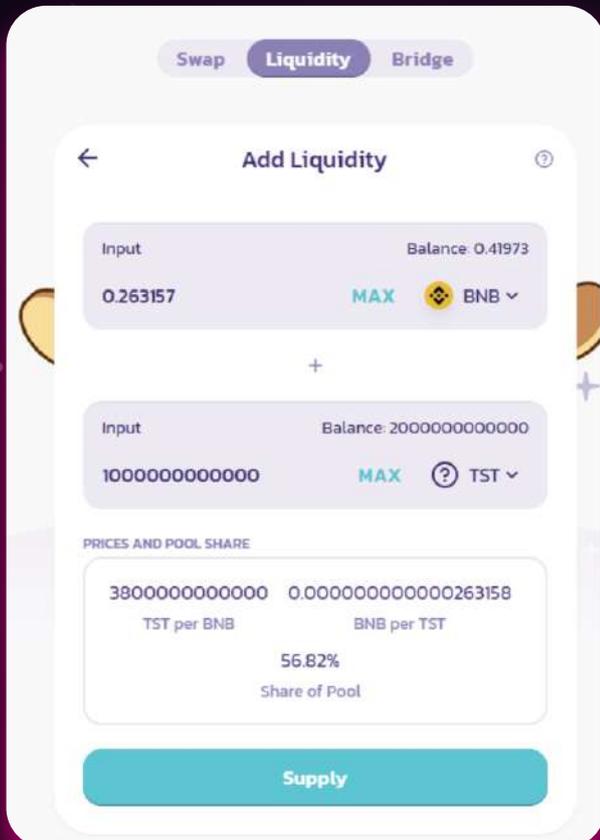

figure 1

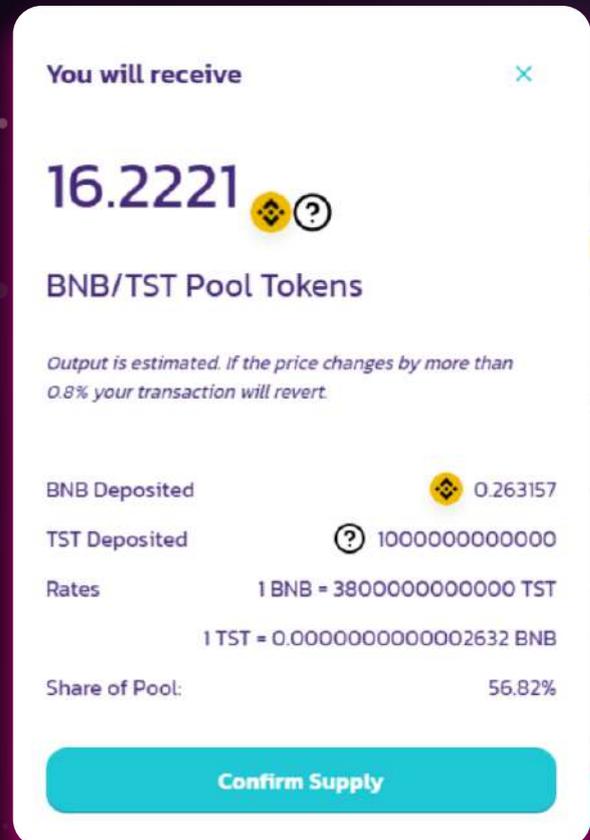

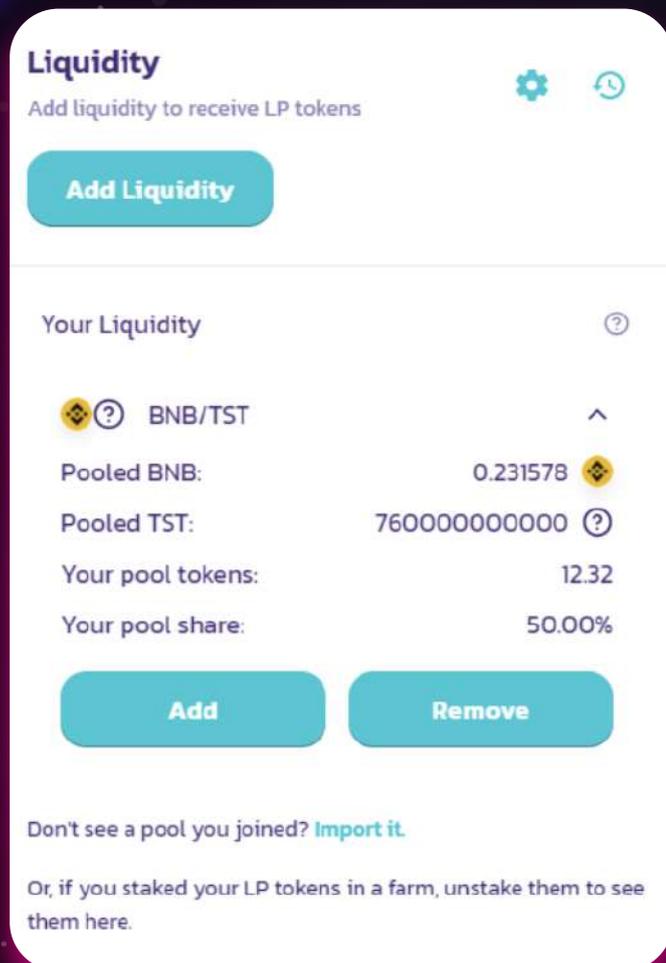

figure 2

PHILANX

CONTRIBUTING TO THE LP TO RECEIVE LP-TOKENS

Once the supply has been confirmed a contribution to the LP has been provided and the contributor will receive LP tokens. (See Figure 3)

figure 3

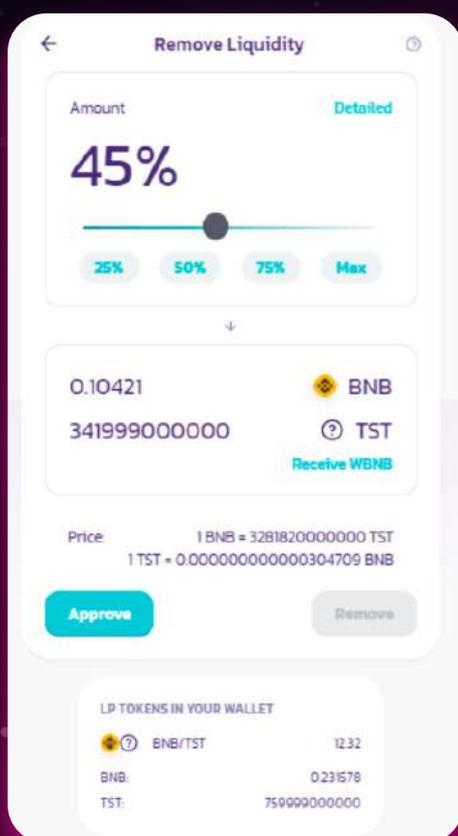

PHILANX

REMOVING CONTRIBUTION FROM THE LP

When removing a contribution from the LP, it will sell the contributor's LP tokens for \$PHILANX and BNB. To proceed with removing a percentage of the contribution to the LP. Select remove in the "Your liquidity" section (See Figure 3).

Once selected, a new window will appear (See Figure 4) to select a percentage to remove from the contribution to the LP.

After selecting a percentage to remove. It will display the amount of BNB and \$PHILANX the contributor will receive back. Once the percentage has been chosen and the amount has been approved, it can now be removed.

The BNB and \$PHILANX will now be available in the contributor's wallet.

figure 4

PHILANX

TAXES & STAKING FEES

There will be 13% buy tax and 15% sell tax for PhilanX. When staking, there will be a 1% staking fee and 15% early withdrawal fee. This is broken down below:

BUY TAX

Total Buy Tax: 13%

BUSD Reflections: 6%
Marketing: 1%
LP: 2%
Treasury: 2%
Dev/Team: 2%

SELL TAX

Total Sell Tax: 15%

BUSD Reflections: 6%
Marketing: 2%
LP: 3%
Treasury: 2%
Dev/Team: 2%

STAKING FEES

Minimum Days Staked: 3 Days
Staking Fee: 1%
Early withdrawal: 15%

The staking fees are taken from the amount of the staked balance

PHILANX

WRAPPED PHILANX

\$WPHILANX will be used for voting power, donations, and philanthropic project proposals within the PhilanX Governance System. \$WPHILANX can only be obtained by staking \$PHILANX or choosing to receive it as a staking reward. \$PHILANX and \$WPHILANX will have a 1:1 ratio.

i.e., staking 100 \$PHILANX will return 100 \$WPHILANX. Donating or transferring 50 \$WPHILANX of the 100 received via staking 100 \$PHILANX will remove 50 staked \$PHILANX from the 100 staked.

Donating, transferring, or unwrapping \$WPHILANX acquired through the NFTs of NFT DROP #1 or harvested as a staking reward will not result in your staked \$PHILANX being deducted. X amount of \$WPHILANX tokens are used to create philanthropic project proposals by Authors .

Delegators will analyse and validate the proposals.

PHILANX

NFTS

PhilanX will have several NFT drops on each of the four networks. Each NFT drop will have utilities that bring benefits to PhilanX and its community.

NFT Drop 1

Each NFT from NFT Drop #1 will provide the holder with a portion of \$PHILANX every day.

NFT Drop 2

NFTs from NFT DROP #2 can be staked to receive BNB from the treasury for a specified period.

NFT Drop 3

Each holder of an NFT from NFT DROP #3 will only pay 6% BUSD Reflection Buy and Sell Tax.

Author NFT's

These NFTs will be appointed to an Author after successfully completing the needed verifications with the PhilanX Team. This NFT will provide authentication for the Author to access the Philanthropic Projects Portal to submit a proposal or manage their current proposal.

PHILANX

PHILANX GOVERNANCE SYSTEM

PhilanX provides a governance system that can be interacted with via \$WPHILANX. Within the governance system, donations can be made to a charity and/or philanthropic project by sending a chosen amount of \$WPHILANX. Moreover, \$WPHILANX can be used by Authors to submit Philanthropic Project Proposals and staked to participate in votes. After the period of the vote, \$WPHILANX token holders will receive their \$WPHILANX back.

DONATING TO A CHARITY

Various charities that accept crypto donations will be vetted and contacted by PhilanX to arrange a payment method using \$WPHILANX. Charities that choose to accept \$WPHILANX as a method of payment will be advertised within the governance system to receive donations of \$WPHILANX.

PHILANX

CHOOSING A CHARITY PHILANX WILL DONATE TO

\$WPHILANX token holders have an additional option to stake \$WPHILANX to place a vote as to which Charity PhilanX should donate a lumpsum to. Once the time of the vote is up, the top chosen answer will receive a donation from PhilanX and

\$WPHILANX will be distributed back to the holders that participated in the vote.

PHILANTHROPIC PROJECTS

Philanthropic projects can be set up via PhilanX or Authors. \$W-PHILANX will be used via Authors to create their Philanthropic Project Proposal. Within the proposal, Authors will be able to provide a:

- Title
- Description
- Website or social links to follow progress
- Contact information to receive support from others (Optional)
- Period to receive donations

Once an Author has submitted their Philanthropic Project Proposal, it will then be analysed and verified by the Bookkeepers of PhilanX to ensure its legitimacy. Furthermore, \$WPHILANX can be staked to vote on which philanthropic project will receive a donation, and support from PhilanX and its team.

PHILANX

AUTHORS

To become an Author, the completion of a vetting process with the PhilanX Team will be required. If the vetting process has been successful, the new Author will be required to burn five billion \$PHILANX tokens to receive the Author NFT to provide access to create philanthropic projects.

PHILANX

TOKENOMICS

The PhilanX tokenomics (See Figure 8, p11) are laid out below:

Total Supply: 8.333 trillion

Treasury: 6.6 trillion

Private Sale: 200 billion

The private sale has an allocation of 1 BNB to 2 billion tokens. Any excess tokens left from the private sale will be burned.

Public Sale: 200 billion

PhilanX Airdrop: 333 billion

Vested Airdrop: 200 billion

200 billion tokens will be vested over the span of 1 month.

Giveaways: 200 billion

To be used to run various competitions and giveaways.

Team: 300 billion

Burn: 300 billion

Max Wallet: 279 billion

Max Sell: 279 billion

PHILANX

Vested Airdrop 2%

Philan Airdrop 4%

Burn 4%

Team 4%

Give Away 2%

Public Sale 2%

private sale 2%

PHILANX

STAKING DAPP

The staking DAPP (Decentralised Application) provides access to stake various \$PHILANX or LP Tokens for \$PHILANX. Each of the 4 networks will have different tokens that can be staked for \$PHILANX

CONCLUSION

PhilanX has many utilities which contribute to a decentralised ecosystem and governance system. PhilanX aims to provide human welfare through philanthropic projects, Stable Coin reflections and donations to community-voted charities through the governance system. PhilanX's mission is provide a tool that establishes a path forward for humanity to help humanity without other forms of entities. PhilanX aims to be a DAO with humanity at its forefront.
